

User manual

AccessEzy Mobile App

AccessEzy Mobile App allows users the ability to manage their security and access control when away from site.

Manual includes

- Downloading the App
- Adding a site
- Using the app
- Controlling a door or gate

Downloading the App

1) Download the remote management app from the App Store. Simply search 'Evo BM'

Adding a site

1) Select sites at the bottom of the screen.

The screenshot shows the 'EVOLUTION ACCESS CONTROL SYSTEM' app interface. At the top, there is a green header with the logo. Below it is a grey bar with the text 'Site Bookmark' and two buttons: 'Cancel' and 'Save'. The 'Save' button is highlighted with a red box. Below this bar are four input fields, each with a label and a value, and each value is highlighted with a red box: 'Site Title' with 'Site Name Here', 'Site URL' with 'WAN IP Address' and 'Port Number', 'User Name' with '123', and 'Password' with '123'. At the bottom, there is a green navigation bar with four icons and labels: 'Connect' (house icon), 'Sites' (link icon), 'Support' (person icon), and 'Settings' (gear icon).

- 2) Enter your site-specific details including the name of your site, your site IP address and your unique username and password. Once complete simply select save. Your site will now display on the home screen. To connect, simply select your site name.

Auto connect site

Set Auto Connect Site

Your Site Name

Using the app

- 1) From the home screen you may navigate to items such as; Live events, Alarms, Users and Doors.

- 2) At any time simply select the return icon to return to the previous screen or the home icon to return to the home page.

Controlling a door or gate

- 1) From the home page simply select 'Doors'

- 2) Select the door or gate you wish to control by selecting the corresponding + icon.

- 3) Select 'Trigger' to release the door or gate.
